

When it comes to incident action planning, swim don't sink.

From the leading provider of incident management training, TIPS™ is a simple system to *kick-start* incident action planning. This new system combines mind mapping techniques and incident documentation into a quick and effective and now operationally proven incident planning system.

TIPS™ was developed by EMANZ in 2006 and is now taught in all our *Applied Coordinated Incident Management System (CIMS4)* courses. These have been attended by staff from the New Zealand Police, New Zealand Defence Force, Department of Corrections, District Health Boards, New Zealand Red Cross, Local Government and many other organisations. We have even taught TIPS™ overseas: its gone global!

Although we have basic instructions on how to use TIPS™ on our website, we recommend that you attend one of our CIMS incident management courses to learn to apply this simple system.

Only
\$29.95
For an A1
sized pad
of 50 TIPS™
sheets

"TIPS is the missing link that now makes the CIMS planning process an effective reality!"
Tom Roche,
Former Convenor
National CIMS Working Group.
