

Make a difference when you are faced with a mass casualty incident

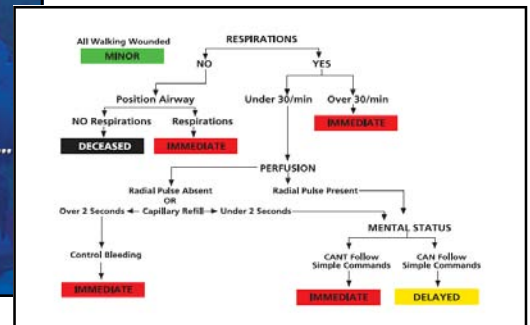

Developed by the Newport Beach Fire & Marine Department (California, USA), the Simple Triage And Rapid Treatment (START) system provides an internationally accepted and proven mass casualty triage tool.

Although START triage is as simple as RPM (Respirations, Perfusion and Mental Status), we have produced colour prompt cards in a handy wallet size, enabling responders to remember the process to determine a casualties priority for treatment and transport.

EMANZ also provides training in mass casualty triage and have done so for organisations such as the New Zealand Red Cross Emergency Response Teams, New Zealand Defence Force, Urban Search & Rescue

Only
\$25
For 100 START
triage prompt
cards

Order Form

Yes, we would like to purchase the EMANZ START prompt cards.

Please courier our order to:

Name:
Delivery address:

Email:
Phone:

Please post the invoice to: (if different from the courier address)

* order numbers only accepted from Government Departments and Local Authorities. Send or fax your order form to us below.
